

# Saving the Planet

By: Chamara

4th Grade—Mary Hooker

If the sun shine on the earth and can not reflect back into space it will make the earth to hot, causing Global Warming!

## Energy

One form of renewable energy is Wind Power, but if birds fly too close to wind mills they die, because windmills are fast when its windy

- Recycling is processing used materials into new products
- The three Rs of recycling are: Reduce reuse recycle
- We can recycle bags cans bottles boxes

What Can Your School Do to Save The Planet?

Our school can help save the planet by picking up all of the trash on the floor
