

Saving the Planet

Global Warming

Global warming is a bad thing for our earth. It can cause the earth to get very hot. That's why we should use less cars and fuel.

Laroyal W.

Energy

2 forms of reusable forms of energy are wind mills and solar panels. These forms of energy are better for the planet!

Recycling

The three Rs for recycling are reduce, reuse, and of course recycle. First lets talk about reusing. You can reuse by drinking a water bottle and using it again. A way you can reduce is by repurposing many items like shoe boxes, jars, and many other items.

Mary Hooker

What can your school do to help save the planet?

- Use less school buses
- Recycle plastic utensils and milk cartons in the cafeteria
- Turn off computers when we're not in the room
- Turn off lights
- Use solar panels to get energy
