

Saving the Planet

Global Warming

Global warming is when the Earth heats up. It is caused by smoking, gas fumes, car fumes, leaving electronics on, and when too many trees are cut down.

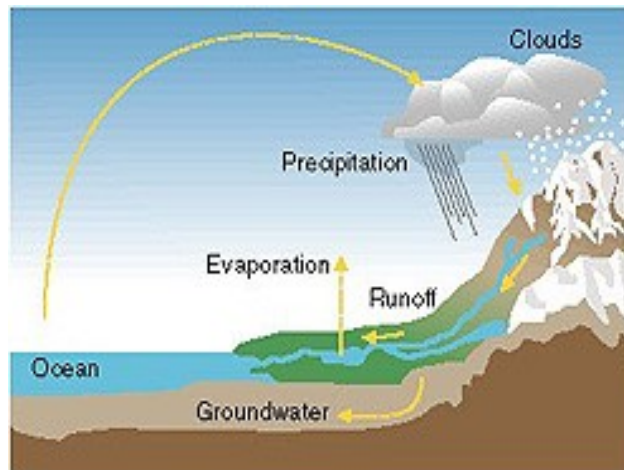

Hurricane Katrina

Hurricane Katrina is one of the deadliest in the United States in New Orleans, Louisiana 2005. A warm patch of water, caused by global warming, made the hurricane stronger.

Energy

Two forms of renewable energy are solar power and wind power.

They are better for the environment because they don't pollute the air.

Aria

What Can Your School Do to Save The Planet?

They should turn off the lights and computers when they are done using them.
