

# Saving the Planet

Axel

## Global warming

Global warming is when green house gases stop heat from leaving the Earth so it gets really hot.

## Hurricane Katrina

Hurricane Katrina is one of the deadliest hurricanes in U.S. history. It hit New Orleans in 2005. A warm patch of water, caused by global warming, made the hurricane stronger.

## Energy

Two forms of renewable energy are:

Water and Sunlight

They are better for the environment because they don't waste a lot of energy or a lot of gas.

## What Can Your School Do to Save The Planet?

My school can save the planet by recycling and turning the computers off when they are not being used.
