

Saving the Planet

Kaylani Wilson

Global Warming

Global warming is when the earth gets too hot. This happens when we smoke and use our cars.

How to stop global warming:

1. We can stop smoking
2. We can stop using our cars

Hurricane Katrina

1 of the strongest hurricane in the hole entire world. It hit New Orleans in 2005.

Hurricane Katrina got stronger after passing a hot patch water. The water got hotter because of global warming.

Energy

Sunlight power and water power are 2 types of renewable energy. They are better for the planet because they don't pollute the air.

What Can Your School Do to Save The Planet?

My school can help save the planet by giving a class on global warming and recycling.
