

# Saving the Planet

Rodrick

## Global Warming

Global warming is when green house gases stop heat from leaving the earth so it gets hot. Smoking and green house gases are two things that cause global warming. We can help stop global warming by not smoking or littering.

## Hurricane Katrina

Hurricane Katrina is one of the most deadliest hurricanes in the history of the U.S. It hit New Orleans in 2005.

Hurricane Katrina got stronger after passing a hot patch of water in the gulf coast. The hot waters were caused by global warming.

## Energy

Sunlight and water are 2 forms of renewable energy.

They don't pollute the air and are reusable

## What Can Your School Do to Save The Planet?

My school can help save the planet by giving a class to all the students about global warming and how to stop it!
