

Saving the Planet

Taraeha S.

Global Warming

One way it started is the earth is getting too hot because of the green house gases. One reason is leaving things on. Another is if you use your car too much.

We can help stop it by turning off the lights. We can also walk instead of using the car.

Hurricane Katrina

Hurricane Katrina destroyed the city of New Orleans, Louisiana in August 2005.

The storm went over hot water in the ocean. Hot water caused it to pick up speed and more rain. The water got hot because of global warming

Energy

Two forms of renewable energy are solar and wind power. They are better for the environment because they are reusable and don't cause pollution.

global warming.
oh no.

What Can Your School Do to Save The Planet?

They can turn off the lights tell students and parents to walk or bike instead of driving.
